

WebHornet Frequently Asked Questions (FAQ)

WebHornet is a product of WhettStone Business Solutions

Q: In what area does WhettStone expect to see the most growth?

A: We have an exciting new product called **WebHornet** which offers one of the most user friendly Web Content Management Systems (WCMS) on the market. Our team has worked on Custom Software for many years and we understand everyone would like to have a custom website, the cost and time to develop one is not always in the budget. For many, a website with key functionality and the ability to edit is just what they need! See all of the features and pricing information for yourself at: <http://webhornet.com/>

Q: Who should contact WebHornet?

A: If your business or organization is in need of a professional website and you do not staff a team of talented developers to create cutting-edge software applications, it might be time to start exploring WebHornet.

Q: Why should you use WebHornet?

A: Simply put, WebHornet easy to use. You will be in control of your website content 24x7x365. You will work with an extremely user friendly WCMS developed by our team of highly-skilled experts with a common-sense approach to WCMS development. Our programmers, designers and project managers have worked with clients in mind to develop WebHornet as a solution tailored to meet their needs now and in the future.

Our team has over 45 years of combined experience in software development encompassing a large number of database systems and network environments. This range of expertise, combined with design talent, lends perfectly to the development of WebHornet as a professional, aesthetically appealing and technically advanced WCMS.

Q: What types of professionals do we work with?

A: We work with businesses of all sizes, non-profit organizations, marketing firms, business coaches, bankers, technical consultants, entrepreneurs and individuals or organizations looking for a trusted website management partner.
